### 37% UNEMPLOYMENT RATE IN USA

December 3, 2016

DON'T BUY THE LIES... here is the truth.

37.3% Unemployment is the true rate for November 2016.

152,085,000 who participated in the labor force in November 2016 is 62.7 percent of the 254,540,000 civilians 16+ able to work.

That means 37.3% of our citizens able and willing to work were unemployed in November 2016, so this is the true unemployment rate in the USA.

Our President is crowing about a "record number of people employed" and "lowering unemployment rates under 5%".

Our Federal government is shameless, dishonest, disgusting, in deliberately deceiving the American people, using their media puppets to spread their lies designed only to hide the real truth and to make their political party appear to be doing great things.

Don't buy the lies.
