Louie E. Johnston Jr.
"From the War Zone"

America has surrendered. We have lost the war.

Louie Johnston Jr. October 24, 2016

The Economic WAR between nations is a global war, because we are in a global economy today, each nation fighting to win but only the strong survive. Please see the statistics below ranking nations.

USA economy GDP growth is ranked #111 in 2015.

USA economy GDP growth at #111 is only 2 spots ahead of IRAQ!.

Ireland economy GDP growth is #7 at 7.8%...why? Because they cut their corporate tax to 15% and businesses rushed to move their corporate headquarters to Ireland to avoid the lunacy of higher corporate tax rates. You see, corporations actually exist to make profit for their investors who risked their savings. No reward = No risk taken by investors, so their money goes where taxes are low.

Hong Kong originated the 15% flat tax for corporations and for personal income that made Hong Kong #1 in economy growth, now listed under China which is ranked #16 with economy GDP growth at 6.9%. I traveled to Hong Kong on business many times to learn their formula of low tax rates and very little government regulation of business, to marvel at their successful growth, infrastructure, a magnet worldwide for business. Ireland copied their formula.

USA Federal Government is the cause of the USA economy GDP growth dropping to be #111 in the world. BOTH POLITICAL PARTIES have allowed the Federal Government to literally CHOKED to death our corporations with the highest tax rates in the world and absolutely ridiculous regulations NO OTHER nations impose, so our corporations fled to nations that want them more. At least 110 nations wanted them more than the USA does by these facts below.

GDP growth Continent

2014 Rank 2015 Rank

Ethiopia 10.315 1 10.200 1 Africa

Palau 4.234 67 9.384 2 Oceania

Papua New Guinea 8.540 5 8.972 3 Oceania

Lesotho 3.448 89 2.468 110 Africa

United States 2.428 117 2.426 111 North America

There we are, 2 spots ahead of IRAQ and below Republic of Congo.

When you see the USA MEDIA and "expert economists" squawking that the USA economy GDP growth ceiling is at most 2.5% and that the "unrealistic expectations of 4% more" is impossible, remember these statistics before you VOTE!

AMERICA HAS SURRENDERED. We have lost the economic war. The consequences are catastrophic, now a debtor nation of over \$20 Trillion. "Expert Economists" are CORRECT stating our GDP ceiling is 2.5% UNDER THE EXISTING FEDERAL GOVERNMENT!

AMERICA has a very short time to remove our Federal Government and REPLACE it with a new one... we must fight to win while we can!
